

We have vacancies for an experienced

Physiotherapist

and a

Therapy Gym Supervisor

at West Berkshire Therapy Centre

Saturday work,

to cover opening hours of 10 – 3.

Competitive salaries with a Saturday allowance

These are **fixed-term contract positions to 31st March 2016**,
with the possibility of an extension.

Background information

We opened on 1st April 2014, providing exercise to help disabled clients keep mobile, using specialised power-assisted equipment. Due to tremendous demand and excellent results, already we are providing over 200 exercise sessions each week, on a not-for-profit basis. Recently we introduced an evening service and the Saturday service being planned will be in strong demand.

The Centre is the only fully equipped community power-assisted exercise gym for disabled people in the region. It was developed by the local voluntary sector in response to significant unmet need. Our physiotherapists conduct assessments, agree individual goals with clients, prescribe exercise and oversee delivery of the service, working closely with the Gym Supervisor and trained volunteers.

We have a strong referrals network and help individuals with neurological, stroke, cardiac, COPD, diabetes, sight impairment, morbid obesity, joint replacements and other disabling conditions.

Previous experience in similar roles is preferred. Both roles require DBS clearance. Candidates will be personable, well motivated and enthusiastic, able to work independently, be adaptable and able to handle a busy caseload. Ideally you can start soon.

Job descriptions are available on request.
